

Course	Specialized Field	Intent of Exam Questions
Strategic Design Course	Strategic Design	The purpose of the strategic design exam is to evaluate the specialized knowledge necessary for education and research in strategic design, which is the fusion of design and business. The questions consist of three main questions that test comprehension, application, and broad imagination skills based on knowledge of various fields related to strategic design.
Environmental Design Course	Architectural Engineering and Environmental Chemistry	To examine the basic knowledge of Architectural Engineering and Environmental Chemistry required for research in the master's program.
	Urban and Architectural Design	Please refer to 'Example Answers' or Intent of Questions' file.
	Landscape Architecture	The questions evaluate basic knowledge and concepts regarding natural environment conservation, landscape ecology, urban environmental design, green space environmental design, and landscape management.
	Social and Cultural Studies on Human Environments	—
Human Life Design and Science Course	Human Life Design and Science	Please refer to 'Example Answers' or Intent of Questions' file.

Course	Specialized Field	Intent of Exam Questions
Design Futures Course	Mathematics, Biology and Computer Science	This examination evaluates the knowledge of calculus, statistics, information science, nonlinear dynamics, molecular biology, and cell biology required for research in the master's program.
	Theory of Art and Design Practice	<p>1. Understanding of art and design as being for society The ability to interpret expressions of art and design. Ability to utilize it.</p> <p>2. Perspectives Ability to relate the history, theory, and practice of art and design to society.</p> <p>3. Skills The ability to deal with society through practice and expression.</p> <p>4. Fundamentals Basic knowledge for Design Process</p>
	Culture and Environment	This question tests basic knowledge of design philosophy, environmental social design, art communication theory, diversity in education, and cultural policy and arts management necessary for research in a master's program. It also tests the ability to logically express one's own thoughts on contemporary social issues based on that knowledge.

Course	Specialized Field	Intent of Exam Questions
Media Design Course	Media Science	Please refer to 'Example Answers' or Intent of Questions' file.
	Media Engineering	To examine the basic knowledge of Media Engineering required for research in the master's program
	Media Arts and Design	This examination evaluates basic knowledge and creative abilities in media expression, including art, graphic design and content design.
	Media Socio-Cultural Studies	Please refer to 'Example Answers' or Intent of Questions' file.
Acoustic Design Course	Auditory Psychology	To examine the basic knowledge of Psychology of Hearing required for research in the master's program.
	Acoustic Environment Assessments	This examination evaluates the basic knowledge of various measurement methods in the field of environmental acoustics, evaluation methods of noise and environmental sound, soundscape, etc., and the basic knowledge of acoustics in general required for research in the master's program.
	Acoustic Engineering/Signal Processing	Please refer to 'Example Answers' or Intent of Questions' file.
	Sound Culture	The exam questions basic knowledge in the field of sound culture required for research in the master's program.
